

KIRNODAY
ENERGY PVT. LTD.

Powering Homes & Industries with

**TRUST
TECHNOLOGY
TOMORROW**

ABOUT US:

Powering industries with smart, scalable solar solutions. Kirnoday Energy helps businesses reduce energy costs & improve long-term profitability with End-to-end Commercial and Industrial Solar EPC Services.

Our Approach:

Maximize savings. Ensure reliability. Build systems that perform for decades.

Siddharth Raval
Founder & CEO

With **15+ years of industrial leadership and execution experience**, Siddharth brings a deep understanding of operations and business efficiency. He leads Kirnoday with a clear vision to make solar not just an energy choice but a **strategic financial decision** for industries. *"Solar isn't just energy it's a commitment to trust, innovation, and long-term reliability."*

Samarth Raval
Co-Founder & CTO

With a strong background in **architecture and specialization in project management** and EPC execution, Samarth ensures every system is designed for **maximum efficiency and long-term performance**. He focuses on building solutions that are technically sound, scalable, and future-ready. *"Engineering is about creating systems that perform flawlessly today and stay reliable for years to come."*

VISION

To become India's most trusted energy partner by creating a future where industries grow sustainably through clean, intelligent, and future-ready solar energy solutions.

MISSION

To transform energy expenses into long-term assets through exceptional project execution, measurable savings, and lifetime energy support.

CORE VALUES

Clarity Over Complexity

We simplify solar, making every decision clear and data-backed.

Ownership Without Gaps

Complete responsibility from consultation to commissioning.

Performance First

Systems designed for maximum efficiency and consistent returns.

Built for the Long Run

Durable, reliable solutions with long-term support.

Trust Through Transparency

Honest communication, no hidden gaps.

7 ASSURANCES BEHIND EVERY SOLAR PROJECT

Free Site Assessment — We visit, assess, and calculate your exact savings. Zero cost. Zero obligation. Before you commit to anything.

Accurate System Size — Sized on your actual 12-month consumption data. Never a guess. Never oversold.

Premium Tier 1 Components — Global certified panels and inverters. Manufacturer warranty documents handed over at commissioning.

End to End Approval Support — DISCOM, net metering, loan sanction handled completely. You never chase a government office.

Financial Transparency — Full ROI, payback, depreciation benefit, and net effective cost shown before you sign.

5 Year Service Assurance — Most companies give you only manufacturer warranty. Kirnoday adds its own 5-year service guarantee on top. Two layers of protection. One promise.

24-hour Response Guarantee — Any issue reported gets a response within 24 hours. Day or night. Always.

QUALITY. TRANSPARENCY. TRUST

| SOLAR INSTALLATION MODELS

ROOFTOP SOLAR

Turn unused rooftop space into a source of clean energy and lower electricity costs.

Benefits:

- ✓ Lower energy bills
- ✓ Quick installation
- ✓ Easily scalable

BIPV SOLAR

Generate renewable energy while enhancing your building's architecture.

Benefits:

- ✓ Modern architectural integration
- ✓ Customizable designs
- ✓ Sustainable and efficient

GROUND-MOUNTED SOLAR

Designed for businesses with available land and high power requirements.

Benefits:

- ✓ High-capacity power generation
- ✓ Optimized performance
- ✓ No rooftop limitations

| SOLAR FINANCE MODELS

ZERO UPFRONT PPA

Kirnoday installs and maintains the solar system you pay only for the electricity you use.

Benefits

- ✓ Zero upfront cost
- ✓ Instant savings
- ✓ Maintenance-free

CAPTIVE SOLAR

Invest in and own your solar plant for maximum long-term savings.

Benefits

- ✓ Complete ownership
- ✓ Higher long-term returns
- ✓ 25+ years of renewable energy gen.

GROUP CAPTIVE SOLAR

Partner with other businesses to invest in a solar project and receive power based on your share.

Benefits:

- ✓ Modern architectural integration
- ✓ Customizable designs
- ✓ Sustainable and efficient

OUR END TO END SERVICES

Our process is built on precision and accountability delivering complete project ownership from concept to continuous performance.

GO SOLAR WITHOUT INVESTING A RUPEE

Switch to solar without any upfront cost. With this model, you don't pay for the plant you only pay for the electricity you use, at a lower rate than your current grid cost. That means immediate savings, zero risk, and no operational burden.

Why This Model Works

- * No capital investment required
- * Immediate reduction in electricity costs
- * Zero maintenance responsibility
- * Improved cash flow for your business
- * Stable, predictable energy pricing
- * Access to clean energy without financial burden
